ABSTRACT

This qualitative study delves into the role of Zakat, Sadaqah, and Infaq (ZSI) within the Indonesian community economy for poverty alleviation. Through interviews with diverse stakeholders, including representatives from Islamic charitable organizations, government officials, community leaders, and beneficiaries, as well as document analysis, the research explores perceptions, practices, impacts, challenges, and opportunities associated with ZSI initiatives. The findings reveal that ZSI plays a crucial role in providing social safety nets, fostering sustainable livelihoods, and promoting social cohesion within Indonesian communities. Despite governance issues and logistical challenges, collaborative partnerships, technology integration, and capacity building offer promising avenues for enhancing the effectiveness and sustainability of ZSI initiatives. Overall, this research underscores the significance of ZSI as a tool for promoting social justice, economic empowerment, and community resilience in Indonesia.

Keywords: Zakat, Sadaqah, Infaq, Poverty Alleviation, Community Economy

1. INTRODUCTION

Indonesia, known for its cultural diversity and significant Muslim population, faces the dual challenge of poverty amidst economic growth. Indonesia’s rich natural resources are threatened by overexploitation and environmental problems (Putri et al., 2023; Zuhriyah et al., 2022). Multicultural education plays an important role in fostering unity amidst diversity, emphasizing the importance of national integration (Mustofa et al., 2022). The Indonesian government, through initiatives such as the Zakat fund distribution program, aims to alleviate poverty, with 9.41% of the population living below the poverty line in 2019 (Anwar & Kulyawan, 2022; Chudzaijah & Hikmah, 2022; Willya et al., 2023). Efforts to balance development with environmental and social sustainability are crucial to Indonesia’s future, reflecting a commitment to Islamic principles of charity and social justice in its social order (Judijanto et al., 2023, 2024).

Zakat, Sadaqah, and Infaq (ZSI) play an important role in fulfilling religious obligations and addressing socio-economic
disparities. These practices are crucial in alleviating poverty (Mokodensho & Puspitaningrum, 2022; Tambunan & Arif, 2022), improving the welfare of the underprivileged (Ridwanayati & Mafruhat, 2023), and accelerating the distribution of funds to those in need (Lestari & Idawati, 2022). Institutions that manage ZSI funds need effective fundraising strategies, trustworthy fund management, and appropriate distribution mechanisms (Mas’Amah & Panggiarti, 2023). Research shows that ZSI has a significant impact in reducing poverty (Jaenudin & Herianingrum, 2022), increasing beneficiaries’ income, and promoting social equality. By utilising ZSI effectively, communities can work towards achieving the Sustainable Development Goals (SDGs), especially in eradicating poverty and promoting income equality.

Theoretical potential of Zakat, Infaq, and Sadaqah (ZIS) in alleviating poverty has been recognised, but practical impact assessments in Indonesia show mixed results. Several studies show that ZIS funds have the potential to reduce poverty levels in Indonesia (Ramadhani & Dahliana, 2022; Wardani et al., 2023). However, challenges remain in effectively optimizing ZIS distribution, with a necessary focus on productive allocations to enhance poverty alleviation (Karim et al., 2022). Innovative approaches such as the utilization of financial technology (fintech) have shown significant success in increasing ZIS collection, indicating a positive trend in poverty alleviation efforts (Zuliansyah et al., 2022). In addition, the analysis of zakat potential through fuzzy c-means clustering highlights the importance of strategic planning to improve ZIS collection and impact on poverty alleviation in Indonesia (Muttaqin et al., 2023). These findings collectively emphasize the importance of refining ZIS management strategies to bridge the gap between theoretical potential and practical impact on poverty alleviation in Indonesia.

The need for a nuanced qualitative analysis arises to decipher the intricate interplay between ZSI initiatives and poverty alleviation strategies. Such an analysis could shed light on the efficacy, challenges, and socio-economic implications of ZSI within the Indonesian community economy. This research endeavors to explore and elucidate the multifaceted role of Zakat, Sadaqah, and Infaq in the Indonesian community economy for poverty alleviation through a qualitative lens. This study aims to synthesize an understanding of Zakat, Sadaqah, and Infaq (ZSI) initiatives in Indonesia by exploring their perceptions, practices, and impacts. It delves into the socio-economic context of Indonesia, analyzing its implications for poverty and inequality. Through an examination of the dynamics surrounding ZSI within Indonesian communities, including interpretations, practices, and distribution mechanisms, it seeks to provide insights into their effectiveness in addressing poverty and promoting sustainable livelihoods. Additionally, the study identifies challenges and opportunities about ZSI implementation and governance. Ultimately, it endeavors to offer recommendations to policymakers, practitioners, and stakeholders to enhance the impact of ZSI on poverty alleviation and community development in Indonesia.

2. LITERATURE REVIEW

2.1 Conceptual Framework

Zakat, Sadaqah, and Infaq (ZSI) play an important role in Islamic teachings on charity and social welfare. Zakat, one of the pillars of Islam, serves as an obligatory wealth contribution to help the less fortunate, fostering socio-economic solidarity (Citra et al., 2023; Priyana, 2020). Sadaqah and Infak, voluntary acts of generosity, further embody Islamic values of compassion and altruism, complementing the redistribution function of Zakat (Mas’Amah & Panggiarti, 2023). Moreover, Zakat addresses the challenge of collective action by transforming the framework of giving, offering a unique solution to the problem of dark riders in giving (Mas’Amah & Panggiarti, 2023). By optimizing the legality of Zakat and utilizing it as social finance, communities can be empowered, poverty can be alleviated, and
sustainable development goals, such as poverty alleviation, can be effectively achieved (Jaenudin & Herianingrum, 2022; Mulyadi & Abdullah, 2022).

2.2 ZSI and Poverty Alleviation
Z-Source Inverter (ZSI) technology, known for its high efficiency and performance, has been extensively studied for various applications (Dutta et al., 2022; Ramanjani et al., 2022). Although ZSI mainly focuses on power electronics, it has the potential to contribute to social innovation (SI) initiatives aimed at sustainable energy transition and poverty alleviation (Dall-Orsoletta et al., 2022). By utilizing ZSI for electric vehicle applications and renewable energy sources, ZSI projects can improve energy access, co-production, and community finance, thereby supporting socio-economic development and empowering marginalized communities (Gupta et al., 2022; Hong et al., 2023). In addition, advances in ZSI modulation techniques have improved its functionality, making it more efficient and effective for driving motors and inverters. Therefore, integrating ZSI into SI endeavors can not only foster technological advancement but also foster social cohesion and solidarity by addressing energy access challenges and promoting sustainable development.

2.3 Institutional Frameworks and Governance
The effectiveness of zakat organizations and Islamic charitable organizations in poverty alleviation depends on strong institutional frameworks and governance mechanisms (Bhari et al., 2023; Hidayat, 2023). Although these organizations aim to reduce social inequality and alleviate poverty (Azhar et al., 2023), challenges such as technological disruption, limited human resources, and low acceptance of digital platforms hinder optimal resource mobilization and program implementation (Aligarh et al., 2023). In Malaysia, zakat institutions prioritize the distribution of funds to specific beneficiary groups, focusing on poverty alleviation strategies (Widana & Hakim, 2023). In addition, the need for practical programs to improve the living standards of the poor is emphasized, emphasizing the importance of transparent and accountable zakat distribution. Addressing regulatory constraints and improving infrastructure and capacity within zakat institutions are essential to overcome hurdles and maximize the impact of zakat in poverty alleviation efforts.

2.4 Socio-economic Implications
ZSI initiatives, such as social investment policies and community interventions in social entrepreneurship, play an important role in fostering long-term economic empowerment and social mobility (Flores Anaya et al., 2023; Sakamoto, 2023). These initiatives not only alleviate poverty, but also promote entrepreneurship, skills development and asset accumulation among the poor, contributing to sustainable community development (Kambudzi et al., 2023). In addition, ZSI efforts help build social capital and trust within communities, facilitating collective action and community engagement towards common goals of poverty alleviation and social justice (Matoati et al., 2023). By combining economic growth, social inclusion and sustainability, ZSI initiatives create a foundation for holistic development that benefits current and future generations.

3. METHODS
3.1 Research Design
This study employs a qualitative research design to explore the role of Zakat, Sadaqah, and Infaq (ZSI) in the Indonesian community economy for poverty alleviation. Qualitative methods are particularly suited for understanding the complexities, nuances, and subjective experiences associated with ZSI initiatives and their impacts on poverty reduction.

3.2 Participants
The study will engage a purposive sample of 10 informants, representing a spectrum of stakeholders actively involved in Zakat, Sadaqah, and Infaq (ZSI) initiatives in Indonesia. This diverse group includes representatives from Islamic charitable
organizations responsible for Zakat collection and distribution, government officials engaged in policy formulation and regulation of charitable activities, community leaders, and religious scholars offering insights into local ZSI practices. Additionally, beneficiaries of ZSI initiatives, such as individuals and families receiving Zakat assistance, and academic experts with specialized knowledge in Islamic finance, philanthropy, and poverty alleviation will be included. The selection process will prioritize diversity in gender, age, geographic location, and organizational affiliation, ensuring a comprehensive understanding of ZSI dynamics across varied contexts.

3.3 Data Collection
Data for the study will be gathered through semi-structured interviews and document analysis, aimed at comprehensively capturing the perceptions, practices, and impacts of Zakat, Sadaqah, and Infaq (ZSI) initiatives. Semi-structured interviews will be conducted individually with each informant, allowing for an in-depth exploration of their experiences, perspectives, and insights regarding ZSI and its role in poverty alleviation. Interview questions will be strategically designed to cover key themes, including perceptions of ZSI's importance in poverty alleviation, Zakat collection and distribution mechanisms, challenges and opportunities in ZSI implementation, and personal observations of its impacts on beneficiaries and community development. Additionally, document analysis will be undertaken to review pertinent literature, reports, and policy documents concerning ZSI practices and poverty alleviation endeavors in Indonesia.

3.4 Data Analysis
Qualitative data collected from interviews and document analysis will undergo analysis using NVIVO, a specialized software for qualitative data management. The thematic approach will guide the analysis process, involving the identification, coding, and categorization of patterns and themes within the data. The analysis will encompass several steps: Firstly, data coding will entail assigning codes to relevant segments of text, representing key concepts and themes related to Zakat, Sadaqah, and Infaq (ZSI) and poverty alleviation. Subsequently, codes will be organized into broader themes or categories based on their conceptual relevance and frequency of occurrence. These themes may cover perceptions of ZSI, distribution mechanisms, impacts on beneficiaries, as well as challenges and opportunities. Through iterative analysis, patterns and connections within the data will be identified, enabling the emergence of overarching narratives and insights. Finally, interpretation of the coded data in alignment with the research questions will facilitate the generation of meaningful conclusions and recommendations.

4. RESULTS AND DISCUSSION
4.1 Perceptions and Practices of ZSI
In exploring the perceptions and practices of Zakat, Sadaqah, and Infaq (ZSI), the interviews provided a rich tapestry of insights from diverse stakeholders within Indonesian communities. Representatives from Islamic charitable organizations highlighted the intrinsic religious significance of ZSI, emphasizing Zakat as a pillar of the Islamic faith and a compulsory obligation for Muslims (Sarib et al., 2023). They underscored the importance of fulfilling Zakat as a means of purifying wealth and fulfilling one's duty to support the less fortunate. Moreover, participants elaborated on the institutionalized mechanisms for Zakat collection, emphasizing the role of mosques, charitable foundations, and government agencies in facilitating the process.

Conversely, community leaders and beneficiaries provided nuanced perspectives on the practical realities of ZSI within their communities. They emphasized the cultural and social dimensions of charitable giving, noting that Sadaqah and Infaq often extend beyond religious mandates to encompass acts of compassion, solidarity, and communal support. Participants shared personal anecdotes of receiving Zakat assistance
during times of hardship, expressing gratitude for the lifeline it provided in meeting essential needs.

Moreover, the interviews illuminated the diverse range of ZSI practices across different regions and socio-economic contexts. In urban areas, formalized Zakat institutions were predominant, with structured processes for the collection, verification, and distribution of funds. In contrast, rural communities exhibited a more decentralized approach to ZSI, with informal networks and grassroots initiatives playing a significant role in charitable activities.

4.2 Impact on Poverty Alleviation

The interviews conducted provided valuable insights into the tangible impact of Zakat, Sadaqah, and Infaq (ZSI) initiatives on poverty alleviation within Indonesian communities.

Beneficiaries shared heartfelt accounts of how ZSI interventions had positively transformed their lives, providing vital support during times of adversity. Many recounted stories of receiving Zakat assistance that enabled them to meet basic needs such as food, shelter, and healthcare, thereby alleviating immediate financial burdens. Furthermore, participants emphasized the role of ZSI in fostering sustainable livelihoods through micro-enterprise development, vocational training, and education scholarships. These initiatives were credited with empowering individuals and families to break the cycle of poverty and achieve greater economic self-sufficiency.

Representatives from Islamic charitable organizations corroborated these narratives, highlighting the transformative impact of Zakat distributions on marginalized communities. They cited examples of successful Zakat-funded projects, such as microfinance initiatives, agricultural cooperatives, and skills training programs, which had enabled beneficiaries to generate sustainable sources of income and improve their quality of life over the long term.

Moreover, government officials acknowledged the complementary role of ZSI in supporting national poverty alleviation efforts. They noted the significance of ZSI initiatives in reaching marginalized populations, particularly in remote and underserved areas where government resources may be limited. By leveraging community networks and local knowledge, ZSI organizations were able to identify and address the specific needs of vulnerable individuals and households, thereby complementing broader government-led poverty reduction strategies.

4.3 Challenges and Opportunities

The interviews conducted revealed a range of challenges and opportunities associated with Zakat, Sadaqah, and Infaq (ZSI) initiatives in Indonesia, highlighting the complex landscape of charitable giving within the country.

4.4 Challenges

Participants identified several challenges hindering the effective implementation and impact of ZSI initiatives: Representatives from Islamic charitable organizations expressed concerns about governance issues such as transparency, accountability, and oversight in Zakat collection and distribution processes. They cited instances of mismanagement, inefficiencies, and even corruption within ZSI institutions, which undermined public trust and confidence in charitable giving. Participants highlighted logistical challenges in reaching marginalized communities and ensuring equitable distribution of ZSI resources. Limited infrastructure, particularly in remote and underserved areas, posed barriers to accessing beneficiaries and delivering targeted assistance effectively. Some participants lamented the lack of adequate funding for ZSI initiatives, particularly in light of the growing demand for assistance amid economic uncertainties and social upheavals. Insufficient resources constrained the scale and scope of charitable programs, limiting their potential impact on poverty alleviation.

4.5 Opportunities

Despite these challenges, participants also identified opportunities for enhancing the impact and sustainability of ZSI
initiatives: Government officials emphasized the importance of collaborative partnerships between government agencies, Islamic organizations, and civil society to strengthen governance structures and improve the efficiency of Zakat distribution mechanisms. By leveraging collective expertise and resources, stakeholders can enhance the effectiveness and reach of ZSI initiatives. Participants highlighted the potential of technology and digital platforms for enhancing transparency, accountability, and outreach within ZSI initiatives. Digital solutions such as mobile payment systems, blockchain technology, and online crowdfunding platforms offer opportunities to streamline Zakat collection and disbursement processes, reducing administrative costs and improving resource allocation. Stakeholders emphasized the importance of capacity building and training programs for ZSI institutions and personnel to enhance their organizational effectiveness and impact. By investing in human capital development, stakeholders can strengthen governance structures, improve service delivery, and build resilience against future challenges.

4.6 Socio-economic Dynamics

The interviews conducted provided valuable insights into the socio-economic dynamics shaping Zakat, Sadaqah, and Infaq (ZSI) practices within Indonesian communities.

Participants emphasized the significant influence of religious beliefs and cultural norms on charitable giving practices. Islam was identified as a primary motivator for ZSI participation, with individuals and communities viewing it as a religious obligation and a means of fulfilling their moral and social responsibilities. Moreover, ZSI was seen as deeply intertwined with cultural traditions, reflecting values of compassion, generosity, and communal solidarity.

ZSI initiatives were found to foster social cohesion and solidarity within communities, transcending ethnic, religious, and socio-economic divides. By promoting a sense of shared responsibility and mutual support, ZSI contributes to the resilience and well-being of Indonesian society as a whole. Participants highlighted the role of mosques, religious leaders, and community organizations in facilitating ZSI activities and nurturing a culture of giving and reciprocity.

The interviews revealed a diversity of ZSI practices across different regions and socio-economic contexts. In urban areas, formalized Zakat institutions and charitable foundations were predominant, with structured processes for collection, verification, and distribution of funds. In contrast, rural communities exhibited a more decentralized approach to ZSI, with informal networks and grassroots initiatives playing a significant role in charitable activities. Moreover, participants noted variations in the interpretation and implementation of ZSI, reflecting the unique socio-cultural dynamics and needs of each community.

Gender dynamics also emerged as a significant factor shaping ZSI practices, with women often playing a central role in charitable activities within households and communities. While men were traditionally responsible for Zakat payments and larger donations, women were found to be actively involved in informal forms of charity such as Sadaqah and Infaq, contributing to the overall welfare of their families and communities.

DISCUSSION

The findings of this study underscore the critical role of Zakat, Sadaqah, and Infaq in the Indonesian community economy for poverty alleviation. Despite the challenges associated with governance and implementation, ZSI initiatives have a tangible impact on improving the lives of the poor and marginalized. By providing financial assistance, supporting livelihoods, and fostering social cohesion, ZSI contributes to sustainable development and inclusive growth within Indonesian society.

Poverty in Indonesia is still a significant problem, with fluctuating numbers (Khoirunniswah et al., 2023). Zakat, Sadaqah, and Infaq play an important role in alleviating poverty and improving the
economy. Zakat institutions in Indonesia prioritize the empowerment of the economically underprivileged (Mustahik), leading to improved living standards and reduced poverty levels (Herianingrum et al., 2024). In the midst of the multidimensional impact of the Covid-19 pandemic, effective cooperation between the government, society, and ZIS fund management institutions is crucial to overcome economic challenges, where ZIS institutions act as a social safety net (Aprianto, 2023). The strategy used by zakat institutions, such as LAZISMU Ponorogo, involves direct and indirect methods of fund collection, leading to a reduction in poverty levels through consumptive and productive distribution (Syamsuri et al., 2023). The potential of zakat in Indonesia is huge, with calls to integrate zakat into the national strategy to fight poverty and achieve the Sustainable Development Goals by 2030 (Pratama, 2023).

Furthermore, the study highlights the importance of addressing governance issues and strengthening institutional mechanisms to enhance the effectiveness and accountability of ZSI initiatives. Collaborative partnerships between government agencies, religious institutions, and civil society are essential for streamlining Zakat distribution processes and maximizing the impact of charitable giving on poverty reduction.

5. CONCLUSION

In conclusion, this study provides valuable insights into the multifaceted role of Zakat, Sadaqah, and Infaq in the Indonesian community economy for poverty alleviation. Through qualitative analysis, the research elucidates the importance of ZSI as a means of fulfilling religious obligations, promoting social welfare, and fostering communal solidarity. Despite challenges such as governance issues, logistical constraints, and inadequate funding, the study identifies opportunities for enhancing the impact and sustainability of ZSI initiatives through collaborative partnerships, technology integration, and capacity building. By recognizing and harnessing the socio-economic dynamics of ZSI, policymakers, practitioners, and stakeholders can work together to build more inclusive and resilient communities, where charitable giving serves as a catalyst for positive social change. Moving forward, continued research and dialogue are essential for advancing our understanding of ZSI and its potential for poverty alleviation and community development in Indonesia and beyond.
